## OAC Wallace 2750 Heat Unit Soybean

### Characteristics

Growth Habit:	Indeterminate
Plant Type:	Upright
Pubescence:	Tawny
Flowers:	Purple
Pods:	Brown
Plant Height:	Medium (96 cm)
Lodging Resistance:	Excellent (1.5)
Disease:	Tolerant to phytophthora
Row Width:	7" to 30"
Hilum:	Brown
Oil Index:	103%
Protein Index:	99%
Seed Size:	Large (5100 seeds/kg)
Days to maturity:	119

### Agronomic Performance

- Excellent yield in both wet and dry years
- Adapted for all soil types in Ontario
- Works well in both conventional and no-till operations
- Intermediate bushiness
- A consistent variety that can be used in non-GMO food grade programs
- Tolerant to phytophthora root rot
- 2007 Ontario Performance Report 3 year average:
  - 2500-2800 HU trial 110%
  - 2700-2900 HU test 103% and 115 days to maturity
- Top yielding variety in the 2500-2800 HU areas for last five years
- Developed by University of Guelph
